

What's New for 2018 WRX STI

- Revised Brembo® Performance Brake System with lightweight monoblock front and rear calipers (now 6-piston on front vs. 4-piston on 2017 model); calipers painted yellow with black STI logo; larger vented discs (13.4 in. front and 12.8-in. rear) now also cross-drilled.
- New electronic Multi-Mode Driver Controlled Center Differential (DCCD) AWD system center differential in place of previous mechanical + electronic; the change provides optimum differential control for improved vehicle cornering, stability and handling.
- 19-in. alloy wheels with dark gray finish.
- Redesigned LED headlights (low and high beams) also includes parking lights and turn signals.
- Steering Responsive Headlights.
- Headlights on/off with windshield wipers in automatic mode position.
- STI Sport Design instrument cluster with color LCD multi-function display.
- Power windows with driver's and front passenger off-delay operation.
- Welcome Lighting.
- Standard security system now monitors hood.
- Heated exterior mirrors standard on all models.
- Carrier Base crossbars available as an accessory roof attachment.
- New-design mesh front grille and new-design black fog light insert covers on STI
- Base model.
- Recaro® brand performance design front seats with embossed STI logo are standard on STI Limited and SE models and optional for STI Base.
- Fold-down rear center armrest with cup holders.
- Red seatbelts.
- Black gloss door trim bezels and center console center panel.
